

WEBINAR

EMPLOYEE-TARGETED WEBINAR

A Workplace Wellness Approach for
Prescription Drug Misuse Prevention

PLEASE JOIN SAMHSA ON SEPT. 7, 2016

at 2PM ET, for a 1-hour training with an
additional 15 minutes of questions and answers
on Health Consciousness & Prescription Drugs.

REGISTER FOR THE WEBINAR

At the following Web site:

<https://join.onstreammedia.com/register/22396317/paw>

ABOUT

This webinar is designed for delivery directly to staff, as a “Lunch & Learn,” for example. It is experiential and interactive, so it is best experienced in a group setting. We invite workplaces to assemble a group for participation. For other participants, this webinar is a chance to appraise the content and meet the developer. The webinar will be archived on the SAMHSA YouTube site, where participants can access and view it later. The webinar facilitator is Dr. Joel Bennett from Organizational Wellness & Learning Solutions.

GOALS

As a result of this webinar, participants will:

- (1) Define “health consciousness” as key to preventing prescription drug misuse.
- (2) List risk factors associated with the increase in prescription drug misuse as well as healthy alternatives that can diminish those risks.
- (3) Take action steps to implement healthy options.
- (4) Use the above skills to reduce prescription drug misuse and addiction in their work setting.

CONTACT If you plan to organize a group to watch the webinar, please contact Michael Neeper at mneeper@organizationalwellness.com who will send you materials to help with the session including handouts and anonymous forms to assess changes in attitudes and behaviors resulting from the webinar.
